The time period for reply, if any, is set in the attached communication.

TH

Office Action Summary	Application No. 10/663,531	Applicant(s) TULLER ET AL.	
	Examiner Matthew C. Landau	Art Unit 2815	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-13 and 16-18 is/are pending in the application.
- 4a) Of the above claim(s) 1-10 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 11-13 and 16-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 25, 2007 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-13 and 16-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 11, the limitation "uses an intrinsic donor to increase donor concentration and high impurity acceptor density of an acceptor dope material" renders the claim indefinite. It is unclear what is meant by the limitation "uses an intrinsic donor to increase donor concentration. Is Applicant simply attempting to claim that the p-ZnO layer contains intrinsic donors? Or are the intrinsic donors actually performing some function to "increase donor concentration" (beyond that concentration obtained by their mere presence)? It is also unclear how the limitation "high impurity acceptor density of an acceptor dope material" relates to the

remained of the claim. The confusion may simply be the result of a grammatical error. For instance, did Applicant intend to claim "'uses an intrinsic donor to increase donor concentration and to obtain high impurity acceptor density of an acceptor dope material" (or something similar)? Further, it is unclear what is meant by "an acceptor dope material". It is suggested this limitation be changed to "an acceptor doped ~~dope~~-material" to be consistent with the dependent claims and the specification. Claim 16 has a similar problem despite a slight difference in wording.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-13 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Kadota et al. (US PGPub 2001/0034115, hereinafter Kadota).

Regarding claims 11 and 16, Figure 8 of Kadota discloses a wide band gap semiconductor device comprising: a substrate 1; an annealed n-type ZnO layer 2 directly positioned on said substrate; and an annealed p-type ZnO 5 layer directly positioned on said n-type ZnO layer. Note that in paragraph[0040], lines 1-3, Kadota discloses that the structure shown in Figure 8 can be such that layer 5 is p-type and layer 2 is n-type. Kadota further discloses annealing the p-type ZnO film (paragraphs [0026], [0030], [0033], and [0034]). Since the p-type ZnO layer is formed above (after) the n-type ZnO film as established above, the n-

type ZnO layer must also be annealed during the annealing of the p-type layer. The limitation "said annealed p-type ZnO layer uses an intrinsic donor to increase donor concentration and high impurity acceptor density of an acceptor dope material, said intrinsic donor is removed during annealing" is merely a product-by-process limitation that does not structurally distinguish the claimed invention over the prior art. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 964, 966.

Regarding claims 12 and 17, the limitation "said acceptor-doped material is exposed to a hydrogen containing atmosphere" is merely a product-by-process limitation that does not structurally distinguish the claimed invention over the prior art.

Regarding claims 13 and 18, the limitation "said acceptor-doped material is exposed to a non-hydrogen containing atmosphere" is merely a product-by-process limitation that does not structurally distinguish the claimed invention over the prior art.

Response to Arguments

Applicant's arguments with respect to claims 11-13 and 16-18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew C. Landau whose telephone number is 571-272-1731. The examiner can normally be reached on 9:00AM - 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ken Parker can be reached on 571-272-2298. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
